About This Game

Glider Island VR is a skill based hang gliding game where your objective is to collect as many hoops as you can within 10 minutes. You must keep airborne by using your rocket booster attached to your glider! You can add rocket fuel by flying through the blue spirals randomly placed around each map. You must plot your course carefully and watch out for the obstacles each map throws your way. You have limited booster so be careful with how much you use and when you choose to collect the blue spirals!

Monthly Tournaments

Each month we host a tournament and the top winners will receive Amazon Gift Cards. Keep track of your scores on the in-game leaderboards and online here <http://www.5drealities.com/Leaderboards.aspx>

Beautiful Maps and Scenery

There are 3 maps and each map comes with unique scenery, soundtrack and surprise event. All maps now unlocked on purchase. The first map is Forest Island with 150 hoops and every two minutes a thunderstorm occurs and you must fight the wind. The second map is Volcano Island with 175 hoops and every two minutes a Volcano erupts and you must dodge lava bombs! The Last Island is Desert Island with 200 hoops and every two minutes a Dust Storm occurs and you must fly with limited visibility and wind. We are constantly updating the game so expect the scenery to be updated often.

Multiple Control Methods

There are two main ways to control the glider. **VR Hand Controllers** or **VR Head Movement**. Each has their own perks. Hand Controls allow for more precision flying but causes your arms to get tired where Head Controls is more intuitive and causes less motion sickness. We also support flying with the Xbox controller or Mouse/ Keyboard if you are so inclined to used those as well.

VR Arcade Ready!

We support Arcades! If you own a location based arcade you can licence Glider Island via Springboard, SynthesisVR, Viveport, or through Steam Site Licensing Program.

Easily one of the greatest Hidden Object games out there. I really like the gameplay and storytelling of the new Artifex Mundi games.

But seriously, like Enigmatis 2: WORST. DETECTIVE. EVER. (Well at least, she's got a gun now^^). This game is the♥♥♥♥♥♥♥♥♥♥it's not even worth a penny!. I really hate to give this game a negative review, but it really didn't deliver what I wanted.

There are three main points I want to adress that would improve the game.

1) Feedback from the screen. In this game, the music only controlls the character... Thats it. There is no system put in place that controlls screen effects (such as screen shake or motion blur) enemy patterns, or color changes. In music games, you need the full experience, this only has it partially done.

2) Design. This game in my opinion is lazily put together. Each stage is a square in which you fight in. There are no walls except for on the outside, and it is the same size in every level. Not only that, but the enemy design in all over the place, but very condenced at the same time. In each stage, you will see the same 3-5 enemy types over and over. And it changes every level. None of them are the same stage to stage, but they are really repetitive in the ones they are in.

3) The upgrade system is horrible. If you are someone who wants to get the best ship they can by the end of the game, this game is not for you. The upgrades are level to level, and not permanite. This means that if you want to grind for levels, it's only going to give you points on the level you are on. This is understandable if you think of it in the way that they don't want you to farm for a long time, but not get so over-powered that you can beat every level first try, but it still doesn't make sence after that. Not only this, but upgrades change nothing on the visible ship. You can get as many upgrades as you like, but your ship will stay the exact same all the way. Although this is a minor detail, it still annoys me on a low level.

Alright, now that all the bad things are there, lets list some good ones.

1) There is controller support. I always find this to be a plus because it encourages more casual gaming. It also makes the movement a whole lot easier.

2) The bullets and music fit together very well. There might not be much else with the music, but when the bullets shoot, I can really see it fitting with the music in every way. This also leads me to something else that could be improved - quiet points in music. Whenever you are going through a build up, or the start of the song, it has no aspects that help you shoot. Everything stops, and you are left up to your doging skills. This is very annoying, and partially ruins the gameplay.

So, this is a good game. Would I recommend it? No. At least not for this price. If you are wanting to try this game, I would recommend getting it from a place like♥♥♥♥♥♥♥♥♥♥or ♥♥♥♥♥♥♥♥♥♥. Or just wait for a sale.

So, final words. This game is a good concept, but it was not made in a way that satsafies.. i have lots of lags and i did not enjoy playing. I have every dlc for tropico 5 and this is probaly the hardest and most boring one. The supercomputer is a cool addition

if you are going for the tech achievement but other than that there is no need for it. I really wish they would release a new dlc that actually affects the game or creates a whole new feel. I love the tropico experience, but the dlc are all pretty much the same..they offer a new tech or factory and then you have to use this to win the scenario. Waterbourne was the last good dlc. The supercomputer dlc is boring as hell. I would rather eat a poop sandwich than play this dlc again. It was also glitchy as hell at first, but I think that got solved. The map is a good map, but the dlc is boring..I cant stress this enough that the dlc is boring and how I would rather eat a poop sandwich on a hot summer day than play this dlc again! God please help tropico developers to create a better more worthy dlc that does not involve the same game play and scenario. Once again, dont play this boring dlc...You might as well get stoned first so that you go into it with some happiness cause this dlc is boring. One time I saw a cat get ran over and playing this dlc was the same experience. That poor cat. I didnt know his name, so I instead named him reggie ray. Poor reggie ray..that cat lived a short life and you will too if you play this DLC. This dlc makes me want to watch his untimely death over and over instead of playing this dlc..I would rather eat that hot poop sandwich on a muggy hot disgusting day while watching this cat die than play this dlc.

good bless you all.

. Great little 2 hour puzzler. Level 57 drove me nuts. The rest were quite manageable. Nice flow and great music.. You like Bullet Hell Shooters? Look no farther, Hitogata Happa has been wooping my♥♥♥♥♥since the day I got it. I play a decent amount of old school shooters, but I was labeled as noob again when I started this game. I recommend this game to the hardcore players that want more than the challenge. It's a quick game you can pick-up and put-down, so we can all get back to our busy lives. Hitogata Happa can be played on most computers and doesnt use much data so gameplay feels consistent. It's a great game, dont be discouraged by the amount of times you die. Sometime you want to die on purpose.

Do I recommend this game?

ANSWER: HELL YES!. This is the Wonderland we love! Cool art makes you look forward to each next enemy.

Though I'd prefer that there were no fights at all, it only distracts from the story.. great game (when it works) ruined by online only single player career.

start a championship in single player career. halfway through lose connection to racenet and lose all progress and have to start championship again. went to play it now and wont connect to racenet so cant play.. Love this game; Too bad the missions are very short, but still i recommend it

a game u might miss

a game u will never miss. This game is worth every penny! Awesome graphics as well as great game play. Plenty of content, and very smooth. Polished look and perfect for VR environment.

Guys...please keep developing more content...you're doing a great job there! Love it!!!. I am disappointed. The game is quite unplayable. The control of the game that a player has is horrible.. Beat all of it and got all the achievements in less than 2 hours. I could very easily just request a refund, and since I have less than 2 hours of playtime, and recently bought it, it would be granted. But I'm not. Why?

Well, for one, I got it for \$0.49. And two, it's a great game.

I guess it's time to go farm it for cards.. i like the mod alot i kinda wish the ANZACs were seperate because as a New Zealander i wouldnt mind being able to use them no matter what i tick but also maybe add the Russians as well overall like this mod alot
